

Lab 5 Questions

- 1.) 85%
- 2.) 36%
- 3.) `customerGreeting()` is not being tested
- 4.) Need to test the method if the customer has less than 500,000 frequent flier miles and if the customer has greater than 500,000.
- 5.) Because in order to test `User`, you have to create a new flight so the constructor for flight is being tested whether the tester intended or not.
- 6.) If the `milesForBooking` is less than 5000, we aren't adding the bonus miles that the flier still earned.
- 7.) Because our test only tests for when the flight is over 5000 miles long.
